Plombco Awarded Patent for Plasteel™ Product Line

VALLEYFIELD (Quebec), February 10th, 2014 – Plombco Inc, one of the world's largest wheel weight manufacturers, has been awarded a patent for their Plasteel™ product line.

Plasteel™ is the first steel core clip-on wheel weight encased in a plastic overmold. The wheel weight market continues to shift toward non-lead wheel weights. Plasteel™ is the best non-lead wheel weight solution in the market. It is easy to install, has exceptional corrosion resistance, it looks great, and it doesn't scratch the wheel.

"We knew there had to be a better solution than the steel and zinc weights that were out there", said Claude Lussier, Plombco's President. "While developing Plasteel™, we took into account all of the things people liked about lead weights, and eliminated the things people didn't like about non-lead weights".

About Plombco

Plombco is a privately held company located in Valleyfield, Quebec. The company was founded in 1985, and has developed the most innovative and comprehensive product lines in the industry. Plombco products are sold to both OEM and aftermarket customers across the Americas, Europe and Asia. To learn more about Plombco, visit www.plombco.com.
